

Keeping Essential Water Services Affordable for All Households

The SPRWS Water Works program was created to provide financial assistance to qualified, low-income customers to help cover a portion of their bills. However, funds are limited and assistance is typically exhausted early each year.

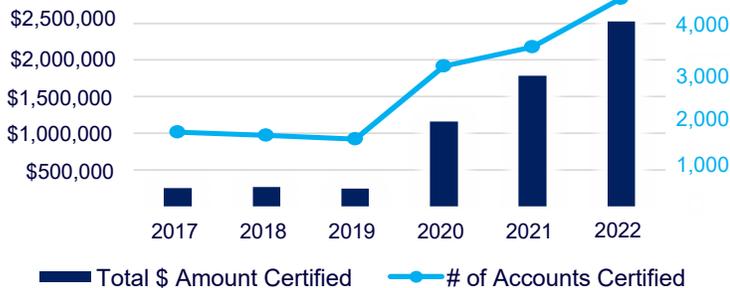

Customer Assistance Provided

The Low-Income Household Water Assistance Program (LIHWAP) significantly increased the amount of aid we provided during the COVID-19 pandemic. However, more customers could have used help based on the number of accounts being certified to taxes even with LIHWAP funding available.

SPRWS certifies unpaid water bills to property taxes as a lien at year end and these have dramatically increased in recent years.

Unpaid Bills Certified to Taxes

Saint Paul Regional Water Services (SPRWS) is a public, regional drinking water utility in the state of Minnesota treating and delivering an average of 40 million gallons of water each day to over 96,000 accounts.

As water infrastructure continues to age, utilities rely on rate increases to support the important investments needed to continue to provide these vital services.

Population Served

448,959

Average Annual Household Water Expense

\$600

Median Household Income

\$70,357

Average Bill Increase 2017-2023

18.5%

Customers in Areas of Concentrated Poverty*

30%

SPRWS Annual Water Works Contribution

\$100,000

*Areas of Concentrated Poverty (ACP) are census tracts where 40% or more are below 185% of the federal poverty threshold.

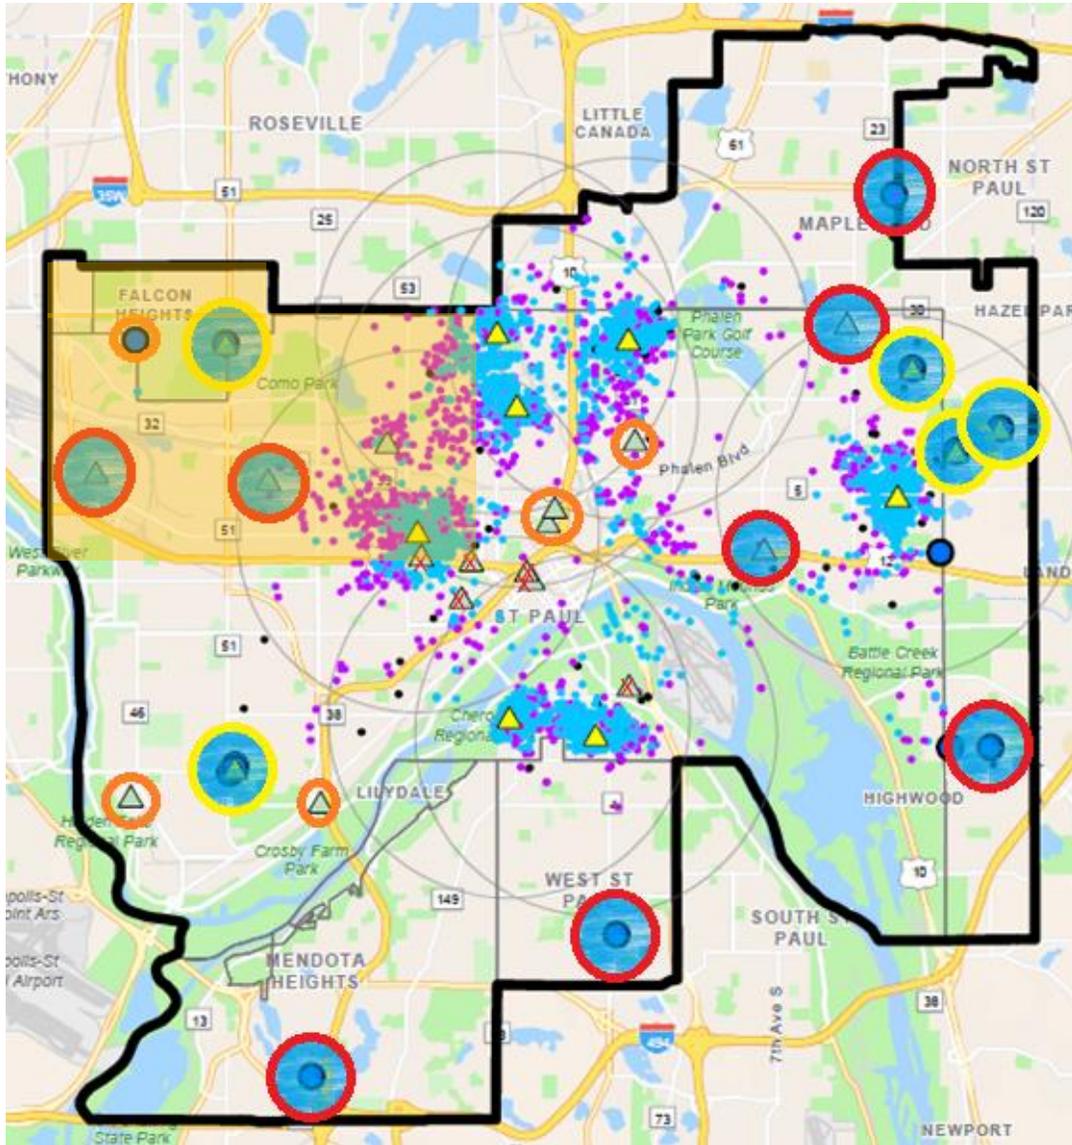

Request for Continued LIHWAP Funding

LIHWAP was created to ensure that economic challenges would not put access to household water and wastewater service at risk. While this has been very helpful, affordability challenges exist beyond the pandemic and ongoing assistance is necessary.

A permanent, federally funded LIHWAP would promote public health among all members of a community similar to existing programs around energy.

Automated Metering Infrastructure + Register Replacement Prioritization
