Think Before You Click: This email originated outside our organization.

I'm so sorry, I think I had something different between the application and email.

It is 0812.

Elizabeth, I stopped by and got the plywood pulled back but the lockbox combination I have 1422 did not work. Please send me the correct combination.

Think Before You Click: This email originated outside our organization.

I'm sorry, I thought that I had put on the application but I'm guessing it was only on one of the versions since it was redone repeatedly.

The instructions were supposed to be specific that it's on the back door, which has screws on the right side, but the left side only has one nail on it so when you pull on the left side, it easily comes off showing you the new lock box right on the door.

And then, as soon as you did the report, then I was just going to put one more nail in again if you need to go repeatedly.

Going to secure what you mentioned.

Hello,

I was at this property today to begin the code compliance inspections process and could not gain access. One door was boarded up, one was screwed shut, there was no lock box except for a broken one attached to the wall by the front door with no cover or key and there was a broken window on the right elevation of the home that looks like it was being used for vagrant access which needs to be boarded shut. Please contact me when these issues have been addressed. I am ok with one door being screwed shut but need one to be accessible for entry.

Regards,

Clint Zane
